

Liberty Pumps®

Model S37

*Builders Series
Submersible
Sump Pump*

**1/3 hp
1/4" Solids Handling
1-1/2" Discharge**

Features:

- Quiet running, Heavy-Duty 1/3 hp motor
 - Dual ball bearings
 - Cast Iron motor plate
- High suction ports to reduce potential jamming
- High capacity flow rates
- Heavy-duty vertical style float switch

Models:
S37 Automatic Vertical Float Switch

Model S37

Builders Series Submersible Sump Pump

The S37 from Liberty was designed to handle the problem areas of sump pumps in new home construction. Powered by a durable 1/3 hp motor, the S37 offers larger clearances around the impeller for better solids and debris handling.

BASIC CONSTRUCTION AND FEATURES:

- Rugged and quiet 1/3 hp motor. Oil filled, thermally protected.
- Permanently lubricated upper and lower ball bearings.
- 1/4" solids-handling with higher intake screening – helps reduce debris from entering the pump compared to bottom suction designs.
- Bi-directional dual lip shaft seal.
- 1-1/2" NPT discharge.
- Thermoplastic vortex style impeller with improved clearances for better debris handling.
- 10' power cord.
- Water directed flow in cast motor plate allows for improved cooling of motor.
- Vertical mechanical float switch with heavy-duty contacts.
- Stainless steel fasteners.
- High head – 25' shut off.

MOTOR SPECIFICATIONS:

1/3 hp 115 volt 6.5 amps 60 Hz. 3450 RPM

Thermally protected
 Maximum fluid temperature 140° F
 Height: 13" Width: 9¾" Length: 9¾" Weight: 14 lbs.
 Approx. Turn-on level 8.25"
 Approx. Turn-off level 2.75"

"The Brick"

Help eliminate jamming from debris. Use "The Brick" sump pump platform for a professional installation.
